Hiring Manager, BMC Software

BMC Software

Application for QA Engineer - Sanjeet Surve

Dear Hiring Manager,

I am excited to apply for the QA Engineer position at BMC Software, as advertised on Glassdoor. With a strong background in quality assurance and a passion for empowering teams to drive continuous improvement, I am confident that my skills and experience make me an ideal fit for this role.

As a Quality Assurance Engineer with hands-on expertise in building test automation frameworks using Playwright and Appium, I am well-equipped to handle the complexities of GUI and API components. My experience in testing complex web-based applications, with a strong focus on risk and controls, data validation (SQL), and secure customer onboarding workflows, aligns perfectly with the requirements of this position.

In my current role at WRXFLO Software India Private Limited, I have developed and implemented comprehensive test plans and strategies, created and executed automated test scripts using Playwright, and conducted deep root cause analysis for identified defects. I am proud of my proven track record of delivering zero-defect releases and maintaining service excellence and integrity in Agile environments.

I am excited about the opportunity to bring my skills and experience to BMC Software and contribute to the success of the team. I have attached my resume for your review. Thank you for considering my application. I look forward to the opportunity to discuss my qualifications further.

Sincerely,

Sanjeet Surve
