Infotech.Works

Application for Junior QA Engineer - Sanjeet Surve

Dear Hiring Manager,

I am excited to apply for the Junior QA Engineer position at Infotech.Works. With a strong background in software testing and a passion for quality assurance, I am confident that I can make a valuable contribution to your team. I am particularly drawn to Infotech.Works because of its commitment to delivering high-quality software solutions and its focus on innovation and excellence.

As a Quality Assurance Engineer with hands-on expertise in building test automation frameworks using Playwright and Appium, I am well-equipped to handle the challenges of this role. My experience in testing complex web-based applications, with a strong focus on risk and controls, data validation (SQL), and secure customer onboarding workflows, aligns perfectly with the requirements of this position. I am also proficient in automation frameworks, testing and domain, languages and web, backend and DB, tools and Agile, which are all essential skills for this role.

In my current role at WRXFLO Software India Private Limited, I have developed and implemented comprehensive test plans and strategies to validate software functionality, ensuring compliance with established quality and risk controls. I have also created and executed automated test scripts using Playwright, facilitating early detection of defects. Additionally, I have conducted deep root cause analysis for identified defects, working closely with developers to support defect resolution and mitigate operational risks. I am confident that my experience and skills make me an ideal candidate for this position.

Thank you for considering my application. I am excited about the opportunity to join Infotech.Works and contribute my skills and experience to the team. I look forward to the opportunity to discuss my application and how I can make a positive impact at Infotech.Works.

Sincerely,

Sanjeet Surve
