Professional Summary

Highly motivated Junior QA Engineer with hands-on expertise in building test automation frameworks for GUI and API components. Proficient in testing complex web-based applications, data validation, and secure customer onboarding workflows. Proven track record of delivering zero-defect releases and maintaining service excellence in Agile environments.

Skills

Technical Skills: Java, Playwright, Appium, Postman, Test Strategies & Planning, Risk & Controls, UAT, JavaScript, Web-Based Application Testing, REST API, SQL Queries, Data Validation, MySQL, PostgreSQL, JIRA (Test Management), Zoho, Git, Jenkins (CI/CD), Docker

Tools And Technologies: Playwright, Appium, Postman, JIRA, Zoho, Git, Jenkins, Docker

Soft Skills: Agile, Continuous Improvement, Root Cause Analysis, Service Excellence, Integrity

Professional Experience

Quality Assurance Engineer - WRXFLO Software India Private Limited

Present – Present

Mumbai, IN

- Developed and implemented comprehensive test plans and strategies to validate software functionality, ensuring compliance with established quality and risk controls.
- Created and executed automated test scripts by developing a robust testing framework from scratch using Playwright, facilitating early detection of defects.
- Executed detailed REST API testing and complex SQL database validation for strict data consistency—ensuring secure handling of critical data.
- Conducted deep root cause analysis for identified defects (using Zoho), working closely with developers to support defect resolution and mitigate operational risks.
- Collaborated with cross-functional teams to analyze requirements, define acceptance criteria, and ensure a culture of code quality and technical excellence.

Projects

Distributed Real-Time Chat System (Technologies: Docker, React.js, MongoDB, Node.js, Stream.io, JavaScript)

Built a low-latency messaging system for 500+ concurrent users, improved delivery by 30%. Optimized MongoDB queries and backend threads for performance and reliability. Dockerized services for 99.9% uptime; applied TDD for robust, maintainable code.

Travel Agent Management System (Technologies: Playwright, JUnit, Java Advanced, MySQL, REST API, React.js, Node.js, Express.js)

Designed booking engine in Java & Spring Boot ensuring transactional consistency. Improved query performance 40% via indexing and microservice refactoring. Implemented Redis caching to handle peak loads efficiently.

Education

Post-Graduation Diploma in Advanced Computing

2025

CDAC

Bachelor of Technology in Electronics and Communication
MIT World Peace University, Pune

2024

Certifications

- Full Stack Developer - CDAC
- Docker - Udemy
- Top 10% in Full Stack Development - upGrad
